

Aanjaneya Pandey

New Delhi, India

8299376784 | pandeyaanjaneya76@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

Education

National Institute of Technology Delhi, New Delhi

Expected May 2027

B.Tech in Electronics & Communication Engineering (Minor in AI & ML)

CGPA: 8.80/10

Relevant Coursework: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, AI/ML

Ewing Christian Public School, Prayagraj

2022

CBSE Senior Secondary

91%

Technical Skills

Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL

Backend & Systems: Node.js, Express.js, FastAPI, REST APIs, WebSockets, RabbitMQ, JWT

Databases & Infra: PostgreSQL, MongoDB, Redis, SQLite, Qdrant, Prisma ORM, Docker, AWS, Azure

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS

AI / ML: LangChain, RAG, OpenAI/Groq API, YOLOv8, NumPy, Pandas, Hugging Face, FAISS, LightGBM

Testing & CI/CD: GitHub Actions, Unit Testing, Integration Testing, Postman, Version Control (Git)

Work Experience

Apiva AI, KITEJOBS Pvt. Ltd.

May 2026 – August 2026

Software Engineering Intern

India

- Developed and debugged backend workflows for an automated application pipeline processing **100+ applications/day**, implementing **6-stage** state management, retry handling, and input validation that reduced recurring workflow failures by approximately **20%**.
- Collaborated with the team and helped building **5+** internal APIs and logging utilities for application tracking and failure diagnosis, reducing average debugging time by approximately **30%**.

Indian Institute of Technology (BHU), Varanasi

June 2025 – July 2025

Software Research Intern

Varanasi, India

- Built low-level communication drivers in **C** on **Zephyr RTOS**; developed a cross-platform benchmarking framework across **3** operating systems and **3+** hardware configurations.
- Applied data-driven tuning and probabilistic modelling to LoRaWAN communication, improving network efficiency by **30%** and reliability by **20%**.

Projects

NextFlow | Next.js, TypeScript, React, Prisma, PostgreSQL, Redis, LangChain

[GitHub](#) | [Live](#)

- Architected a visual AI workflow automation platform with a **React Flow** canvas supporting **4 reusable node types** and a **DAG-based execution engine** that resolves dependencies, runs independent nodes in parallel, and tracks status, duration, and errors per step.
- Unified **5 LLM providers** Groq, OpenAI, Gemini, Claude, and Ollama, through a single execution layer with **PostgreSQL + Prisma** persistence and **Docker** orchestration.

Rayvex | FastAPI, PostgreSQL, Redis, RabbitMQ, LangChain, Groq API, Next.js

[GitHub](#)

- Developed **Rayvex**, an AI revenue-recovery agent with a deterministic state machine, a **12-rule policy engine**, and a **LangChain** agent (**10+ structured tools**) for schema-validated, expected-value-based decisions, built using **FastAPI, PostgreSQL, Redis**, and RabbitMQ.
- Verified recovery via independent payment-state confirmation and benchmarked against a naive-retry baseline on **5,000+** synthetic cases, validated by **200+** automated tests.

IntruSight | Python, FastAPI, React.js, YOLOv8, OpenCV, SQLite, WebSockets

[GitHub](#)

- Engineered a real-time AI video analytics platform for **5 concurrent camera streams** with a **4-stage detection pipeline** MOG2 gating, **YOLOv8** classification, zone filtering, dwell-time verification cutting false alarms by **91%** (**878** raw triggers to **78** confirmed events).
- Deployed multi-threaded per-camera capture across **4+ concurrent streams** via **FastAPI WebSockets**, enabling real-time delivery, live monitoring, and analytics dashboards with **SQLite** persistence.

Achievements & Highlights

- Semifinalist, Flipkart GRiD 8.0** (AI Engineering), advancing through multiple national-level coding rounds.
- Advanced to **Round 2** of **Google BigCode Contest**, ranking among the **top 1,500** participants globally.
- Secured **Rank #1** in **NxtWave Code Combat**, outperforming **10000+ participants** nationally.
- Secured a perfect **10.0 SGPA** in first year of B.Tech, reflecting strong academic consistency.
- Solved **700+ DSA problems** across platforms; achieved **Guardian (2,603 rating)** on **LeetCode**.
